# Dreer's Reliable Bulbs

**TO SUCCEED** with bulbs it is necessary to begin right, by getting sound bulbs of good size, and we would warn intending purchasers against buying cheap, undersized bulbs and expect the fine results obtained from such as we offer. Our sources of supply are the best in this country and abroad, the leading growers of the world having for years supplied us with their choicest stock.

**WHEN TO PLANT.** The larger part of the bulbs offered in this Catalogue are usually ready to ship before the end of September, and the sooner they are planted after that the greater will be the measure of success, more particularly those for indoor culture; therefore, **ORDER EARLY.** A few sorts, which are noted in the Catalogue, do not mature until October and November, and are forwarded as soon as ready.

Full cultural directions are given in our book, **Dreer's Hints on the Growing of Bulbs.** Price, 25 cts. per copy, postpaid; or free to customers who ask for it when ordering.

### A New Introduction of Real Importance

## The BLUE ROMAN HYACINTH VIRGINIA

This Blue Roman Hyacinth, which has been successfully grown for the last few years, comes from France. It is a cross between a very fine porcelain blue Dutch Hyacinth, and the Early White French Hyacinth, from which it receives its daintiness and earliness of bloom.

Virginia has much larger bells, and the stem is longer than the White Roman. It will produce two to three perfect flower spikes to the bulb.

Virginia will bloom for Christmas, in the greenhouse. If not required at that time it may be grown cool and flowered when wanted.

**Monster Bulbs:** 30 cts. each; \$3.00 per doz.; \$19.00 per 100, postpaid.

# Dreer's Cottage Garden Tulips

(Top size bulbs only)

This beautiful class is quite distinct from the early flowering, Darwin and other sorts offered, coming into bloom in the vicinity of Philadelphia about May 10th. On account of their extreme hardiness, and long lasting qualities, they are specially adapted for the permanent hardy flower border. They may also be naturalized in grass, wild gardens, etc. For bedding they are superb, while as cut

flowers, having long stems with flowers of great substance, they stand in perfect condition for a long time. In planting, the bulbs should be set a little deeper than early tulips, a covering of 4 inches being about right.

**Gesneriana Spathulata Major.** A superb Tulip of strong yet graceful growth; very large flowers of an intense brilliant crimson scarlet (28 inches). Our stock is true to name. 80 cts. per doz.; \$5.75 per 100.

**Grenadier.** Very large flowers of a fiery orange-scarlet, one of the most effective Tulips (20 inches). 70 cts. per doz.; \$5.00 per 100.

# Dreer's Select Single Early Tulips

(Top size bulbs only)

The Tulip is always attractive for its beauty and brilliancy of color; and is one of the popular early spring flowers. A few bulbs, scattered here and there produce but little effect, but when planted in masses or in groups, they become at once grand and brilliant, and eclipse in variety of coloring and picturesque effect almost any other flower. We only offer such kinds as can be used with perfect success either indoors or out in the garden. Tulips require cultural treatment similar to Hyacinths; the bulbs, being smaller, should not be planted so deep. When grown indoors, put 6 bulbs in a 6-inch pan or pot.

PARROT OR DRAGON TULIPS

# DREER'S SUPERB Narcissi, or Daffodils

There are no hardy bulbous plants which have more points of merit than the Narcissi or Daffodils. Perfectly hardy, growing and doing well in almost any and every position, sun or shade, moist or dry. All conditions seem to suit them although they have a preference for a good, deep soil and semi-shaded position and every vacant corner in the garden, amongst the grass, under the trees, etc., etc., could not be used to better advantage than by filling with Narcissus, and every hardy border should have a number of clumps interspersed through it. They are equally suitable for pot culture for winter flowering. Three or four bulbs can be put into a 5-inch or 6-inch pan or pot, and with the same treatment as given to Hyacinths, the dull winter and early spring months can be made bright with their exquisite gold and silver blossoms. But it is outdoors that Narcissus do best, and once planted need little attention, the clumps as a rule multiplying and giving larger and finer results each year.

GIANT TRUMPET NARCISSUS OLYMPIA

## Giant Trumpet Narcissi

The Giant Trumpet sorts are the showiest of the genus, and also the most useful, growing easily either indoors or in the open ground. Everyone of the varieties of this type offered on this and the next page are deserving of extensive planting.

**Emperor.** This grand variety, while surpassed in size by some of the newer varieties, is one of the finest Daffodils in cultivation, pure yellow trumpet of very large size, and wide overlapping, rich primrose perianth; for bedding, naturalizing or growing in pots in the house it is unequalled. Double nosed bulbs. \$1.50 per doz.; \$11.00 per 100.

**Empress.** This fitting companion to Emperor is also of strong, robust growth, with fine large flowers; the perianth snow white, trumpet rich yellow, serrated and flanged at the edges; one of the best bicolors and of rare beauty for cutting. Double nosed bulbs. \$1.50 per doz.; \$11.00 per 100.

**Giant Princes.** One of the most popular; perianth sulphur-white; trumpet rich yellow. As a forcing variety it is superior in every way, and a fine sort to plant in quantity for naturalizing. Double nosed bulbs. 85 cts. per doz.; \$6.00 per 100.

This beautiful variety cannot be forced or grown indoors. Double nosed bulbs. \$1.50 per doz.; \$10.00 per 100.

**Argent.** Alternate rows of pure yellow and larger pure white petals. A long stemmed double flower of very graceful form. Open faced and friendly looking. The texture of the white petals glistens as if dusted with silver. Free-flowering midseason bloomer. \$1.25 per doz.; \$8.00 per 100.

# LILIUMS

(Read Carefully before Ordering)

**SPECIAL NOTICE.** Lily bulbs will be forwarded as they mature. Please note time of delivery for each variety. Unless prepared to care for those received in December, please defer ordering until you receive our Garden Book for 1934, in which these will be offered for Spring delivery. These bulbs are so perishable that we cannot accept their return. It is advisable to prepare your Lily bed early in the autumn and cover with 3 or 4 inches of litter. This will keep the ground from freezing and permit the planting of the late maturing kinds, which frequently do not arrive until after hard frost.

In planting, cover the bulbs at least three times their own depth, no animal manure should be used as fertilizer unless thoroughly rotted and worked into the soil beneath the bulbs, setting the latter in pockets of clean soil or sand. When hard frost sets in, 4 to 6 inches of leaves or litter should be placed over them; this should be removed in the spring when danger from hard frost is past. When grown in pots it is advisable to begin with the smallest pot in which the bulbs can be placed, and to shift into larger pots as the plant progresses. Our book, "Dreer's Hints on the Growing of Bulbs," contains very full directions on the Growing of Hardy Lilies. Price, 25 cts. Copies free to customers who ask for it when ordering.

## AQUATIC PLANTS FOR AQUARIUMS

It is doubtful if anything is more fascinating to the young as well as to the older members of the household than to watch the development of animal and plant life in the aquaria. Fish will not thrive unless enough plants are growing to furnish them with oxygen. To do this there should be not less than one plant to every two gallons of water. The ideal temperature is about 50 degrees, and a shady corner, or a window facing north, is best during the summer, and an east window during the winter.

We have prepared a Leaflet giving complete directions for the cultivation of Hardy and Tender Water Lilies, Aquarium plants and other Aquatics. Copies free on request.

# This Year's New Hybrid-Tea Roses

Novelties and Varieties of Recent Introduction

## New Hybrid-Tea Rose, Mrs. J. D. Eisele (Howard & Smith, 1933)

See Illustration Back Cover of This Catalogue  
Granted United States Plant Patent Number 67

The buds, the expanding flowers as well as the fully developed blooms of this Rose are absolutely perfect in every stage of development. This is due to the unfurling petals of the long pointed buds which are arranged in spiral form, reflexing as they unfold giving the fully developed flower, which is from five to six inches in diameter, a most perfect camellia-like formation.

Aside from its beautiful shape it is a Rose of exceptional keeping qualities, the cut blooms lasting fully a week in good condition.

**Color:** In color it is a luscious shade of cherry-rose overlaid with a scarlet glow, this brilliancy being particularly intense and lustrous under artificial light. An unusual feature in the coloring in the open flower and which adds grace and distinction is that the tip of each of the many gracefully placed petals has just the faintest silvery thin wire-like lacing.

**Fragrance:** We have in this Rose the most delightful fragrance (an important factor that is lacking in many other good varieties), to such an extent that only a few flowers in a vase will serve to permeate the entire atmosphere of the room with their sweet fruity odor, resembling that of the noted old Tea Roses of fifty years ago.

**Growth strong, vigorous, erect, of branching habit, very free and a continuous bloomer.**

\$1.50 each; \$15.00 per dozen

**Autumn** (Coddington, 1928). Novel and distinct in coloring, burnt orange streaked and marked with red. Bud of medium size developing into a cupped, double, fragrant, attractive flower. \$1.00 each.

**Betty Sutor** (McGredy & Son, 1929). Exquisite both in the long bud and high-centered, large, double, tea-scented flower. Inside of petals delicate rosy pink; as the flower opens there is a delightful reflecting of the petals which enhances the beauty of the pink tones. Strong, vigorous and free flowering. \$1.00 each.

**Eduard Schill** (Kordes, 1931). Large ovoid bud and very large, full double flowers. The color as the buds first unfold is of a rich coral scarlet overlying a deep old gold ground, as they develop passing to pretty coral rose with satiny golden suffusion. An effective desirable Rose. \$1.50 each.

**Frau E. Weigand** (Weigand, 1928). Bud ovoid developing to large high-centered globular, shapely, double, very lasting, fragrant Marechal Niel-scented flower; in color a brilliant yellow like Golden Emblem. Vigorous and free. \$1.50 each.

**Golden Dawn** (P. Grant, 1929). The ideal yellow garden Rose. The ovoid lemon yellow bud is heavily splashed with crimson before opening and develops into a well-formed, sweetly-scented, large, double, sunflower yellow flower that reminds of the old favorite Marechal Niel. Vigorous and free flowering. \$1.00 each.

**Heinrich Wendland** (W. Kordes Sons, 1930). Buds large, long pointed and very large, double, full, high-centered, intensely fruity fragrant flower of unfading nasturtium-red color, the reverse of the petals a deep golden-yellow. Growth vigorous; flowering intermittently throughout the season. \$1.50 each.

**Hinrich Gaede** (Kordes, 1931). Long pointed shapely bud of nasturtium-red color, large, double, high-centered flowers of ideal shape of a color unusual and unlike any Rose in commerce; a rich luminous vermilion shaded golden yellow such as is found in high colored modern Zinnias. Rich, fruity fragrance. A free and continuous bloomer. \$1.50 each.

**Impress** (Alex. Dickson & Sons, 1929). Very large, full, absolutely perfect blooms that last in perfection a long time; color salmon-cerise suffused with a luminous golden sheen; the bud is large, of ovoid form, cardinal-red, shaded orange; growth strong; a free and continuous bloomer. \$1.00 each.

**Kidwai** (Pernet-Ducher, 1933). Long-pointed bud and full, shapely flower. In color a delicate salmon rose overlying a creamy yellow ground; the lower halves of the petals are of a golden yellow. A distinct and pleasing color combination. \$1.50 each.

**Katharine Pechtold** (Verschuren-Pechtold, 1933). The moderate-sized, exquisitely pointed buds of old gold and bronzy orange open to moderately filled, coppery orange flowers flushed with rose and gold. The fragrance is delicately sweet, reminiscent of old fashioned Clove Pinks. The plants are bushy, free and continuous blooming. A fine Rose with from 28 to 30 petals, being more than other Roses of similar color. \$1.50 each.

**Lucie Marie** (Alex. Dickson & Sons, 1930). Very long pointed buds, deep yellow splashed rosy red. As the outer petals unfold, the inner face is yellow with coppery venation with the petals lightly tipped with pink, slightly fragrant. It is of strong, vigorous, healthy habit of growth with dark leathery foliage. A most distinct and interesting bedding variety. \$1.00 each.

**Lydia** (Verschuren, 1932). Bud long-pointed and moderately large, full, high-centered, perfectly shaped flower of an orange-rose color; of strong, clean, vigorous habit and free flowering; moderately fragrant. \$1.50 each.

**McGredy's Scarlet** (McGredy & Son, 1930). A new red Rose of marked superiority on account of its strong vigorous growth, free and continuous habit of flowering and its brilliant color. The flowers are of good size, full double of a brilliant scarlet, orangy yellow at base of petals, the upper portions of same being lightly touched with crimson, varying some in color under changing weather conditions but always beautiful. \$1.00 each.

HYBRID-TEA ROSE, GOLDEN DAWN

# This Year's New Hybrid-Tea Roses—Continued

## Novelties and Varieties of Recent Introduction

HYBRID-TEA ROSE, IMPRESS. See page 29.

**Schwabenland** (Pfitzer, 1928). There are many pink Roses but none just like this new variety either in color or in the splendid formation of its blooms. The flowers are large; over five inches in diameter, with high spiral center, the petals having a peculiar twist or curl. In color it is a luminous rich rose-pink, retaining its brightness until the petals drop, the flowers are carried singly on long stiff stems. A strong, healthy, hardy, vigorous grower and free flowering. \$1.00 each.

**Sir Henry Segrave** (Alex. Dickson & Sons, 1932). Large, long, well shaped bud and very large, full, beautiful, high-centered, double flower of a deep lemon yellow shading deeper at base; a free perpetual bloomer and sweet scented. \$1.50 each.

**Swansdown** (Alex. Dickson & Sons, 1929). An ideal white which in the autumn has just a tint of cream at the base of the petals. The bud is large, very long pointed of perfect shape, composed of large heavy petals and develops into a splendid full, very sweetly-scented flower of spiral formation. \$1.00 each.

**Vaterland** (Pfitzer, 1928). The most distinct dark colored variety yet introduced, deeper and richer in effect than the Hybrid-Perpetual variety Prince Camille de Rohan, a rich deep velvety scarlet maroon and a splendidly formed high centered flower of remarkable keeping qualities. The plant is of vigorous strong erect habit with healthy foliage and free and perpetual flowering; unquestionably the best of this type that has yet come to our notice. \$1.00 each.

**Victoria Adelheid** (Kordes, 1932). Exceptionally large, well-formed, double flowers of a rich golden yellow suffused with vermilion red shading deeper to the edges of the petals. An effective free flowering variety. \$1.50 each.

**Mme. Jules Guerin** (Gaujard, 1931). An exceptionally large, fragrant, well formed, full double flower frequently measuring over 6 inches in diameter. The long, shapely buds when first expanding are golden-yellow passing to creamy-yellow as they develop. The plant is very vigorous in growth, free flowering and the blooms are carried on strong stout stems. \$1.50 each.

**Mme. Nicolas Aussel** (Pernet-Ducher, 1930). In a French contest, Sept. 15th, 1931, was voted an award of a Gold Medal as The Most Beautiful Rose in France. An outstanding introduction of the late Mr. Pernet-Ducher. In color a bright coppery-red in the very long, shapely, tapering bud that develops into a large, fragrant, full double flower of an exquisite opalescent salmon-pink. Growth vigorous and healthy, free and continuous bloomer. \$1.00 each.

**Mrs. Sam McGredy** (McGredy, 1929). The color of this beautiful variety is quite distinct from anything yet seen in Roses, a wonderful dual combination of vivid shades. A beautiful scarlet coppery-orange is heavily flushed with Lincoln-red on the outside of the petals, and these colors together give a rich and almost dazzling effect. The flowers are of large size and beautiful form, and they possess the proper fullness to make them useful for all purposes. They are very freely produced and delicately perfumed. The plant has a vigorous and exceptionally free habit and is one of the best all-purpose varieties. \$1.00 each.

**Olympiad** (Mme. Raymond Gaujard) (Pernet-Ducher, 1932). The color of Olympiad is unique, a lustrous, dark Oriental scarlet, its depth of color accentuated by the golden base and intensified by a rich velvety sheen. The bud is long and pointed and the flower magnificent in every stage of development. \$1.00 each.

**Portadown Fragrance** (McGredy, 1931). A Rose that pleases, not only on account of its beautiful formation and color but also for its remarkable sweet fragrance, described by its introducer as surpassing any other variety. The bud is long-pointed; the flower very large, double, high-centered and unusually long lasting. Color brilliant orange-scarlet passing to bright rose towards the edge of the petals; of vigorous habit and free flowering. \$1.00 each.

HYBRID-TEA ROSE, LUCIE MARIE. See page 29.

# Three New American Hardy Climbing Roses

Patented Under United States Patent Laws

The New Dawn—The Everblooming Dr. Van Fleet. U. S. Plant Patent No. 1.  
Blaze—The Everblooming Paul's Scarlet Climber. U. S. Plant Patent No. 10.

## THE NEW DAWN THE EVERBLOOMING DR. W. VAN FLEET

The First Plant Patent under the United States Patent Laws has been granted to the originators of The New Dawn Rose, giving them the sole rights for the propagation of this desirable new variety.

A counterpart of the beautiful, popular, flesh-pink Rose Dr. W. Van Fleet, excepting that it is perpetual flowering throughout the season.

This new Rose is a sport from Dr. Van Fleet which is universally acknowledged as one of the best and most popular American Climbing Roses. This new variety is identical in every way with its parent in size

and formation of its long pointed flesh pink buds and double flowers, but blooms continuously throughout the summer and fall months. Really the first worth while Hardy Everblooming Climber introduced.

## CLIMBING ROSE, BLAZE, THE NEW HARDY EVERBLOOMING SCARLET AWARDED UNITED STATES PLANT PATENT NO. 10

It is a very vigorous climbing variety which will grow to considerable height and produce flowers on both the old and new growth. A Rose that is destined to enormous popularity. Strong two-year-old plants, \$2.00 each; \$20.00 per dozen.

## GOLDEN CLIMBER

(Mrs. Arthur Curtiss James) U. S. Plant Patent No. 28

NEW SCARLET EVERBLOOMING  
CLIMBING ROSE, BLAZE

A new departure in hardy climbing Roses, the first true golden yellow climber of quality bloom able to withstand sub-zero temperature without injury.

The most interesting and unusual feature is that the resistance to sub-zero temperatures is combined with blooms of Hybrid-Tea type and quality, most always solitary on long stems often reaching 18 inches or longer.

The plant does not bloom itself out in one short outburst but the buds appear and bloom in succession for a long season. After the first bloom, the plants show continued floral activity and recurrent blooms come forth, when the plant is well established.

The color in the bud is true golden yellow with heavy markings of orange scarlet showing between the sepals. These splashes gradually disappear and the full open bloom is solid golden yellow, semi-double with a heavy cushion of nankin yellow stamens. The petals are unevenly ruffled and beautifully crinkled and informally curled. The Roses are long lasting as cut flowers or on the bush and exhale at all times a delightfully delicate fragrance.

Of extreme vigor, and handsome foliage, the plant will soon cover a large area, whether on a fence, trellis, wall or pergola. Strong two-year-old plants, \$2.00 each; \$20.00 per doz.

We will deliver one strong two-year-old plant of these three beautiful climbing Roses, the set of three varieties, to any post office in the United States for \$5.50

THE BRILLIANT NEW EVERBLOOMING CLIMBING HONEYSUCKLE

# DREER'S CHOICE HARDY SHRUBS

NOTE—We usually begin digging Shrubs about the middle of October, and planting may be continued successfully from then until the ground is frozen. Shrubs can only be sent by Freight or Express, at purchaser's expense. They are too heavy and large to be sent by mail. No charge for boxes, packing or delivery to express, freight or steamship lines in Philadelphia.

**SHRUBS** are as much a part of the well balanced garden as the lawn or flower borders. Many of them are as decorative as any, ornamental foliage plant, while others are highly useful as cut flowers, and a well-arranged planting presents an attractive appearance throughout the entire year.

**The late autumn is the ideal time to plant Shrubs.** The plants can usually be dug any time after the middle of October and set out from then until the ground is frozen, which rarely happens before December in this latitude. When planted in fall they get the benefit of the early spring months in which to make roots and become established before hot weather sets in.

## Althea (Rose of Sharon)

**William R. Smith.** The variety offered here was named in memory of the late William R. Smith, one of the most able horticulturists of his time, who, for many years, was in charge of the development of the Botanic Gardens at Washington, D. C. This variety is outstanding in merit, with glistening pure white single flowers of giant size, fully 4 inches in diameter, that open out flat or salver-shaped, quite different from the older types which only partially expand. Strong plants, 3 to 4 feet, 50 cts. each.

## New Red-leaved Japanese Barberry (Berberis Thunbergi Atropurpurea)

Similar in all respects to the green-leaved Japanese Barberry which is so popular for mixing in the shrubbery border, as single specimens, or for planting in clumps on the lawn, as well as for foundation plantings and for hedges, but the foliage of this new variety is of a rich, lustrous, bronzy red similar to the richest red-leaved Japanese Maples. As the season advances, this new Barberry becomes more brilliant and gorgeous and in the fall its foliage changes to vivid orange scarlet and red shades.

All that is required to develop its brilliant coloring at all seasons is that it be planted in full exposure to the sun.

## Two New Early Strawberries

### Fairfax and Dorsett

Developed by scientists in the U. S. Dept. of Agr. Selected from thousands of seedlings.

In the opinion of most of those who have tested them, they far surpass in quality any variety known to growers in this country. The "royal" flavor of these berries coupled with the fact that the plants of both varieties are unusually vigorous, healthy and productive, and that the berries average large in size and of beautiful appearance, we believe will make them the leading early berries, even displacing Premier in many places. The berries of Fairfax and Dorsett differ in some ways. Fairfax berries, after they become fully ripe, are dark in color although they stay firm for many days after ripening. Dorsett berries are light in color and maintain their light color even when fully ripe.

Either of above varieties, 75 cts. per doz.; \$1.00 per 25; \$1.50 per 50; \$2.50 per 100.

## Mastodon Strawberry

# Dreer's Reliable Flower Seeds

On the following pages we give a list of Seeds of the **Best Hardy Perennials**, which are now so deservedly popular. With little trouble you can have by sowing this summer or early autumn, an abundant supply of Columbines, Canterbury Bells, Foxgloves, Gailardias, Hollyhocks, Larkspurs, Forget-me-nots, Daisies, Sweet Williams, etc., etc., for flowering in 1934.

Hardy perennials are easily grown from seed. In many cases they are a little slower than annuals, but with intelligent care they are successfully raised, and from seed is an excellent way to develop a stock of perennials.

To assist our patrons in securing the maximum results from seeds, we issue a leaflet, "Growing of Flowers from Seed," which we will gladly enclose with any order on request.

A PRETTY LITTLE ROCK GARDEN

The following collections are made up of the popular, easy to grow sorts that invariably do well under the conditions found in the average garden. With each collection is included a leaflet Growing of Flowers from Seed, and if the instructions given therein are followed, success is almost certain.

At the reduced prices at which the various collections of flower seeds are offered, we regret that no changes in the varieties can be made.

**Campanula Medium or Canterbury Bells**

The seeds should be sown in finely prepared, rich soil—the colors in separate rows—and if the weather is dry, they should be given a thorough watering late every afternoon. The little plants should be transplanted early in October to the places where they are to bloom the following summer. Some evergreen branches, or a little straw or coarse hay, thrown over them when the ground begins to freeze makes all the winter covering these plants require.

**Cup and Saucer Canterbury Bells**

This is unquestionably the finest type of this old-fashioned and much prized garden plant. They differ from the ordinary type in having an extra large calyx, which is of the same color as the flower, giving the appearance of a cup and saucer. - 3137** A grand new species discovered in 1928 in Eastern Nepal, growing at a height of 14,000 feet. It may be described as a very handsome, robust, biennial plant, reaching under good cultivation anything from 3 to 5 feet in height. The winter condition of this species is particularly handsome. The long pale green leaves, often 15 inches in length, become covered with soft silvery hairs, forming a rosette well over 2 feet across, an ornament in itself and unmatched by any other species of *Meconopsis*. From the centre of this rosette there issues a central stem clothed with smaller leaves and much branched. In June the first flowers open and provide a display for several weeks. The color is a beautiful soft yellow, and on well-grown specimens the flowers are from 4 to 6 inches in diameter, enlivened by a cluster of orange stamens. Its great enemy is excessive wet during winter months. If this can be guarded against, there is no difficulty attending the cultivation of this fine newcomer. It has received all the honors that can be bestowed on a plant—both the Royal Horticultural Society's Award of Merit and the First-Class Certificate. Pkt., 50 cts.; 3 pkts., \$1.25.

# DREER'S PERFECT PANSIES

For best results you must start with a good strain. The finest Pansies are, as a rule, shy seeders, which accounts for the difference in the price of the various mixtures offered.

About the middle of August is the best time for starting Pansy seeds for early spring blooming, as this allows the plants to go into winter in vigorous condition. A soil containing a proportion of leaf mold, well enriched with well-decayed cow manure, will be the most satisfactory for the growing of this flower, and it should be well dug and made fine and level.

Sow the seeds in drills, covering them not more than four times their diameter and firming the soil well above them. The seeds germinate in from eight to twelve days, and should not be allowed to dry out during this period. Covering the seed bed with newspapers will prevent this and hasten somewhat the period of germination.

As soon as the plants are up and large enough to handle, they should be thinned out or transplanted to stand nine inches apart.

## Platz Green Hand Duster

Where dusting with dry insecticides is preferred over wet spraying we suggest this most easily operated machine.

It is light, compact, sturdy and efficient.

Has a capacity of 2 to 4 pounds, is constructed with a large, powerful bellows, and is complete with a 30-inch extension and spreader.

It is easy to work and regulate, is practically indestructible—wearing parts can be readily replaced. The Green Hand Duster is just the tool for dusting either hill crops or underside of foliage and will handle any dust that can be used in larger outfits.

## CELEBRATED LAWN GRASS SEEDS

### Early Fall Is the Best Time to Seed or Re-seed Your Lawn

At no other time of the year is the weather so equable. There are no unheralded frosts to prevent the germination of the tiny seeds or to blight the tender young plants; there is little or no likelihood of torrential rains like those of spring, which delay the sowing or re-sowing of the lawn or wash out the seed after it has been sown.

Sunshine is in abundance, but it is warm and mellow. It does not burn out the new grass like the scorching sun of late spring and summer. Fall grass and crab grass have done their worst for the season and cannot sprout forth unexpectedly to choke out the finer growth. Summer droughts are almost a full year away and, by that time, the root system of the lawn will be well established.

By all means, choose this fall to make or re-make your lawn. Ask for leaflet on Lawn Making.

Note—No cheap annuals, such as Timothy, are included in any of our Lawn Mixtures, for we aim to produce permanent results rather than a quick but temporary effect.

### The "Dreer" Lawn Grass

A high quality mixture of grasses offered for the purpose of quickly producing a permanent lawn. It is a careful blending of varieties adapted to producing the thick growth and velvety appearance so much sought after. Each variety of grass in its composition is there for a special purpose; some for making strong fibrous roots, which take hold upon the soil and keep the turf in place, others of a creeping nature quickly fill up any bare spots which may be caused by the taller sorts dying down. Per pt., 25 cts.; per qt., 45 cts.; 4 qts., \$1.40; peck, \$2.50, prepaid. By express or freight at purchaser's expense,  $\frac{1}{2}$  bushel (10 lbs.), \$4.50; bushel (20 lbs.), \$9.00; 100 lbs., \$44.00.

### Dreer's "Evergreen" Lawn Grass

This special mixture produces beautiful and permanent lawns, and is composed of grasses which are adapted for the purpose of producing turf which retains its rich green color and velvety appearance throughout the entire summer and fall. This is our finest medium priced mixture, and is absolutely dependable. Per pt., 20 cts.; per qt., 35 cts.; 4 qts., \$1.25; peck, \$2.00, prepaid. By express or freight, at purchaser's expense,  $\frac{1}{2}$  bushel (10 lbs.), \$3.50; bushel (20 lbs.), \$7.00; 100 lbs., \$33.50.

### Dreer's Fairmount Park Lawn Grass

This popular, low-priced mixture is well suited for various soil conditions, giving good results even in small city grass plots, where the soil is generally stiff and heavy. Valuable for use on embankments and terraces; also for renovating old, worn-out lawns. Per pt., 15 cts.; per qt., 25 cts.; 4 qts., 95 cts.; peck, \$1.75, prepaid. By express or freight, at purchaser's expense,  $\frac{1}{2}$  bushel (10 lbs.), \$3.00; bushel (20 lbs.), \$6.00; 100 lbs., \$28.00.

### Dreer's "Golf Links" Grass

For a thick turf that will stand the hard usage suffered by the average Fairway. For the Golf Course, Teeing Ground, Football and Polo Fields and other Athletic Grounds, or for the Lawn which has to withstand hard wear, this mixture will give perfect satisfaction. Per pt., 20 cts.; per qt., 35 cts.; 4 qts., \$1.25; peck, \$2.00, prepaid. By express or freight, at purchaser's expense,  $\frac{1}{2}$  bushel (10 lbs.), \$3.50; bushel (20 lbs.), \$7.00; 100 lbs., \$33.50.

### WHITE DUTCH CLOVER SEED

Excellent for use on lawns; forms a close herbage and remains green throughout the winter season. We furnish the choicest grade of seed. Oz., 10 cts.;  $\frac{1}{2}$  lb., 45 cts.; lb., 85 cts., postpaid. By express or freight, at purchaser's expense, lb., 75 cts.; 5 lbs., \$3.50; 10 lbs., \$6.75; bushel (60 lbs.), \$39.00; 100 lbs., \$63.00.

### Dreer's "Putting Green" Mixture

The varieties comprising this mixture are all of the fine-bladed, low-growing and most hardy kinds, and maintain their rich, green color throughout the season. For Tennis Courts, Putting and Bowling Greens, and wherever a billiard table smoothness is necessary, this superfine mixture will give the desired result. Per pt., 40 cts.; per qt., 75 cts.; 4 qts., \$2.40; peck, \$4.50, prepaid. By express or freight, at purchaser's expense,  $\frac{1}{2}$  bushel (12 $\frac{1}{2}$  lbs.), \$8.25; bushel (25 lbs.), \$16.50; 100 lbs., \$65.00.

### Dreer's Terrace Grass

Ordinary lawn grass will not hold the soil on terraces and embankments, which require a thick turf, composed of varieties which make strong roots to hold the soil and prevent washing by heavy rains. Our Terrace Grass is a carefully prepared combination of creeping rooted grasses as will fill the requirements by making a quick growth of grass which will form a strong mat and present a good appearance. Per pt., 25 cts.; per qt., 45 cts.; 4 qts., \$1.40; peck, \$2.50, prepaid. By express or freight, at purchaser's expense,  $\frac{1}{2}$  bushel (10 lbs.), \$4.50; bushel (20 lbs.), \$9.00; 100 lbs., \$44.00.

### Seashore Lawn Grass

A rich, green lawn is especially desirable at the seashore, but unless the right mixture of grasses and clover are used the result will be disappointing. Our Seashore Lawn Grass is composed of strong rooted varieties which quickly produce a good turf. In preparing the land it should first be top-dressed with about four inches of good soil, as grass will not grow well in sand. Per pt., 25 cts.; per qt., 45 cts.; 4 qts., \$1.40; peck, \$2.50, prepaid. By express or freight, at purchaser's expense,  $\frac{1}{2}$  bushel (10 lbs.), \$4.50; bushel (20 lbs.), \$9.00; 100 lbs., \$44.00.

### Dreer's Shady Place Grass

Usually it is difficult to obtain a satisfactory growth of grass under trees and in shady places, and we recommend the use of this special mixture which will quickly produce an abundant and even growth of grass. The varieties used in making this special mixture are only those that are well adapted for growing in shade. Per pt., 25 cts.; per qt., 45 cts.; 4 qts., \$1.40; peck, \$2.50, prepaid. By express or freight, at purchaser's expense,  $\frac{1}{2}$  bushel (10 lbs.), \$4.50; bushel (20 lbs.), \$9.00; 100 lbs., \$44.00.

### Special Formulas

There are numbers of our customers who, through their knowledge of the soil and climatic conditions of their immediate locality, wish to procure a mixture of Grasses which they know will succeed with them and we shall be pleased at all times to submit prices of, or to prepare, mixtures for any purpose whatever according to the customer's own formula. A complete list of the finest re-cleaned Natural Grasses will be found on page 72.
